

TigerTurf – New Zealand’s only manufacturer of synthetic turf since 1981

TigerTurf is an innovative synthetic grass and sports surfaces business. With facilities world-wide, TigerTurf is committed to the research, development and manufacture of premium grass surfaces for all landscape and sports applications. TigerTurf are a ‘full package’ company with in-house capabilities that are second to none, providing design, quotation, construction, manufacture, installation and on-going maintenance.

TigerTurf – guarantee*

TigerTurf manufacture each genuine Astrograss surface at its Penrose plant. We can therefore guarantee the quality of every surface produced. And advice and information on anything from base construction, installation and post installation maintenance is just a phone call away.

TigerTurf synthetic grass is made from either polypropylene or polyethylene yarn. These materials are durable, resistant to staining, are UV stabilised and the most suitable materials for synthetic grass use. The grass is tufted into a rubber-backed polypropylene mat for added durability.

TigerTurf and the environment

Through ongoing research and development TigerTurf monitors materials used to find more efficient manufacturing and installation methods, as well as being involved in research projects looking closely at recycling old “Astroturf” and developing 100% recyclable products for the future.

TigerTurf FAQ’s

What is TigerTurf grass made from?

TigerTurf synthetic grass is made from durable polypropylene or polyethylene yarn.

How long will TigerTurf last?

Under normal use (light to moderate traffic), TigerTurf synthetic grass can be expected to last 15-20 years. TigerTurf synthetic grass comes with a no fuss, 7 year product only warranty*.

Does TigerTurf grass fade?

TigerTurf is UV stabilised to minimise fading and deterioration.

What about dogs?

TigerTurf is pet friendly. Our synthetic grass is designed to drain even under the heaviest rainfall, doesn’t stain; and any mess can be scooped up and cleaned easily.

What about life’s little accidents?

Synthetic grass is very resistant to staining. Spills can be cleaned easily. Damage to the grass can be repaired, in a similar method to repairing carpet.

How do I install TigerTurf grass?

Installation of a perfect grassed area is naturally dependent on the quality of workmanship during all stages of the process. We recommend that TigerTurf be installed by qualified contractors to ensure the best result, however an installation guide is available on request.

What goes underneath the grass?

The grass must be laid on a suitably prepared base such as compacted metal, concrete or wooden deck. The base will depend on soil type and final usage. The grass is then “in-filled” with a combination of sand and/ or granular rubber for the most natural look and feel, and to secure the grass in place.

** Warranty is based on the surface being used and installed to TigerTurf’s specifications.*

Innovative synthetic grass solutions

TigerTurf Landscape

Want the grass to be **greener** on your side of the fence?

TigerTurf synthetic grass is always green, always lush. It requires no watering or mowing, so relax and enjoy. TigerTurf is experiencing dramatic growth in demand for its range of products for landscaping applications, from the home back yard to open public spaces. Our latest landscaping products have been developed specifically to harmonise with the natural environment, improving safety for children, increasing usage for the community and bringing green and durable grass surfaces to outdoor areas without the need for water, pesticides, mowing or weeding.

TigerTurf excel in the provision of products for the home garden market. TigerTurf manufacture synthetic lawn products that give the look and feel of natural grass but offer the family, pets included, all the added benefits of the latest synthetic solutions. First class presentation, low maintenance and durability in high usage areas are the hallmarks of TigerTurf synthetic grass. It looks and feels just like the real thing.

Backyard

Pathway

Synthetic turf puts no limit on creative possibilities.

Synthetic turf puts no limit on creative possibilities. The versatile, low maintenance and all-weather characteristics are well known in the sports world and applications are now being sought elsewhere. Indoor and outdoor synthetic grass solutions offer comfort and durability, whilst gardens, patios and decking can all be transformed with a synthetic grass makeover.

TigerTurf: Domestic

These days people with limited time find it difficult to care for natural lawns. TigerTurf gives everyone the opportunity to have the feel and look of a natural grass landscape with a range of options that can be used for a variety of applications. Residential lawns, pool surrounds, putting greens and play areas can be transformed into lush, green, durable surfaces all year round ensuring children and pets can play and enjoy the environment.

TigerTurf: Commercial

Already very popular in southern Europe and Australia, the civil application for synthetic grass not only saves local councils and developer's money due to reduced watering and maintenance, it is also perfect for hard to access areas where a natural landscape in urban areas is preferred.

TigerTurf provides an innovative grass alternative where companies and councils can now benefit from a long lasting green oasis, providing green space for people to relax and socialise. TigerTurf is also ideally suited to internal applications such as atrium and concourse space, meeting and greeting areas.

TigerTurf: Exhibition

Creating a distinctive setting to showcase your company or product is essential to attract attention at any event. TigerTurf offer a range of products for exhibitions, product launches and displays that simulate the outdoor environment while offering the durability needed to withstand high levels of foot traffic. More and more temporary areas are using synthetic grass as an alternative to carpet, creating an eye catching and professional image.
